DEPARTMENT OF THE INTERIOR

UNITED STATES INDIAN FIELD SERVICE

Fort Apache Agency,  
Whiteriver, Arizona,  
July 18, 1925.

The Commissioner of Indian Affairs,  
Washington, D. C.

Sir:

One copy of the annual census of the White Mountain Apache Indians for June 30, 1925, is transmitted herewith. As these Indians were not allotted it is understood the one copy only is needed.

This census shows the increase of two individuals only over the record for last year. This is due very largely to the epidemics of influenza we had during the winter and to insufficient nutrition. The severe droughts of the last few years has almost destroyed their crops and has greatly reduced the income from their cattle. We had early hopes of rather abundant rains during this and the following month, but up to this date our hopes have not materialized. Should we have another lean season such as the last three or four have been it will probably be necessary to resort to other means to aid the Indians in supplying their needs during the winter.

The statistical reports are now virtually completed and when properly verified will be forwarded. The narrative report is being written and it will soon be ready. I trust that all these reports will be completed and forwarded by this time next week.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Chas. L. Davis".

Chas. L. Davis,  
Superintendent.

UNITED STATES  
DEPARTMENT OF THE INTERIOR  
INDIAN FIELD SERVICE

Fort Apache Agency,  
Whiteriver, Arizona,  
July 22, 1926.

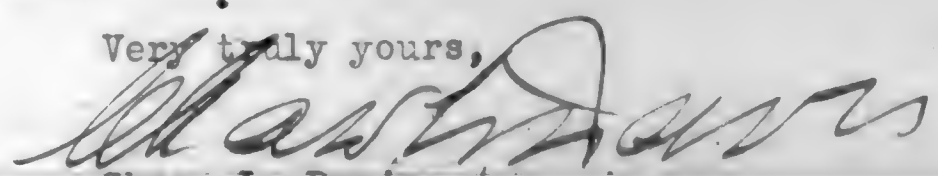

The Commissioner of Indian Affairs,  
Washington, D. C.

Sir:

I am transmitting herewith one copy of the census of the White Mountain Apache Indians as of date of June 30, 1926. It will be noted that this tribe is increasing slowly notwithstanding the ravages of disease which have been augmented by the several epidemics of influenza in the last few years.

Since having charge of this Agency, now over nine years, I have instituted considerable change in the method of keeping the vital statistics. It is not possible to get these vital statistics exact where the Indians live in such isolated localities. Many families are seen only infrequently, and there are many women and children who about never get out away from their homes except as the children are brought to school. To be sure that these vital statistics will be better preserved the census includes many notations of births, deaths, marriages, etc., which are not called for by the form used or by the instructions from the Office. I find it very helpful, however, where the records are properly preserved as we are now doing at this place.

Very truly yours,

  
Chas. L. Davis,  
Superintendent.

CLD/t
